

Patterns of Conflict

A report on conflict-related violence
in the Philippines

**On July 3, 2020,
President Rodrigo
Duterte signs the
Anti-Terrorism Act of
2020**

**JUNK
ANTI-TERROR
BILL!**

FAMALAKAYA

**This was met with
outrage from the
public, triggering
protests amidst a
pandemic**

16 PEACE, JUSTICE
AND STRONG
INSTITUTIONS

GOAL 16

Promote **peaceful and inclusive societies** for sustainable development, provide **access to justice** for all and build **effective, accountable and inclusive institutions** at all levels

Conflict-related Violence

THE 2019 VOLUNTARY NATIONAL REVIEW OF THE PHILIPPINES

Review of the Status of the Implementation of the
Sustainable Development Goals in the Philippines
Focusing on Empowering People and Ensuring
Inclusiveness and Equality

What We Found

- No mention of data on conflict-related casualties
- Briefly mentions the **Bangsamoro Law** as a step towards achieving lasting peace

Trends in Conflict

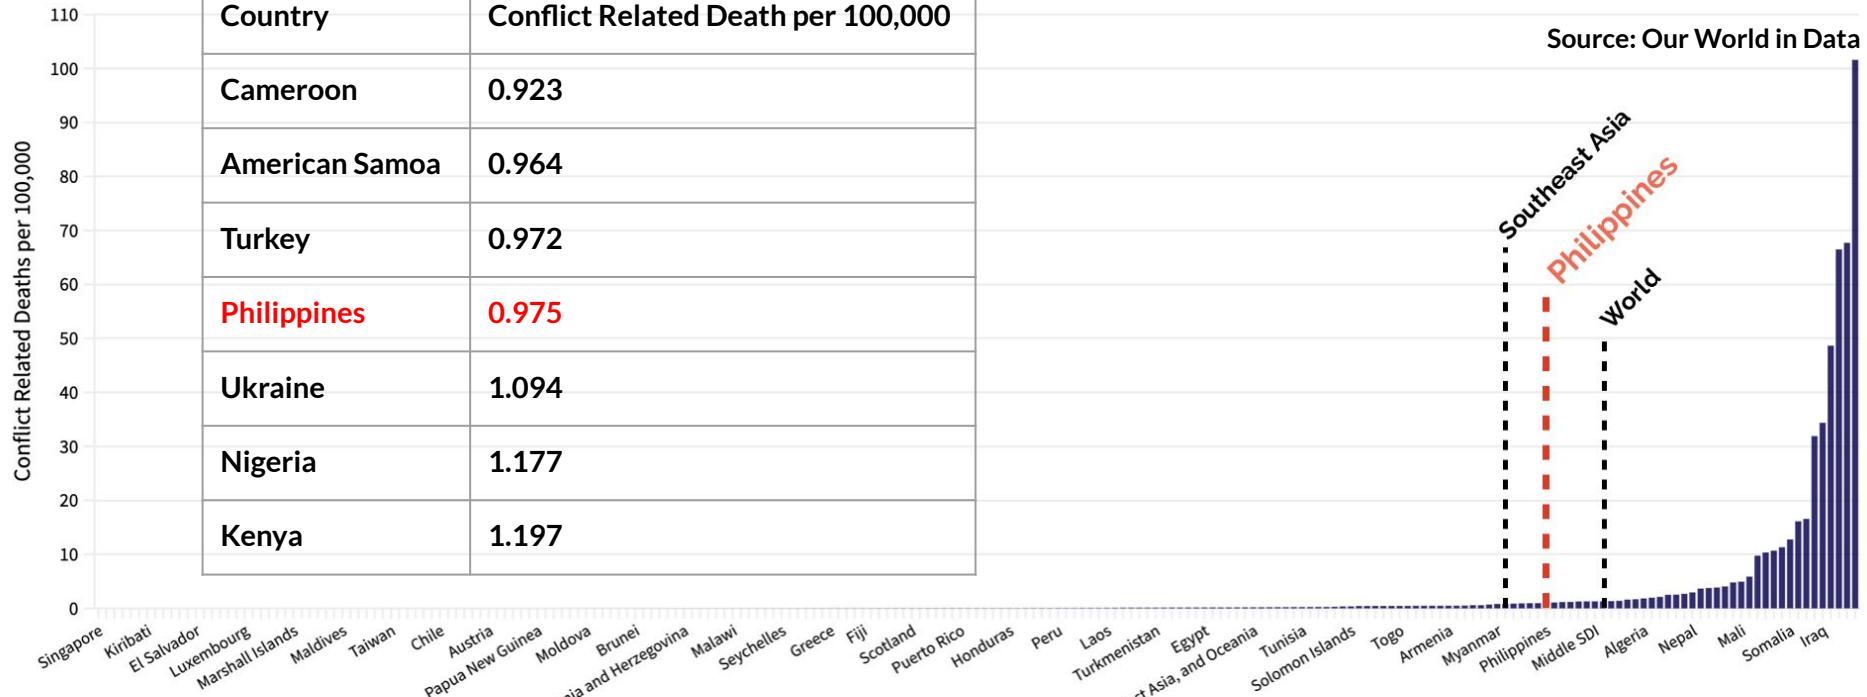

- No significant improvement in conflict related death rate
- Statistically speaking, there is no clear direction in which we are heading
 - Linear regression shows that the Philippines' death rate will **decrease by 0.024 per 100,000** annually – which is **close to nothing** (Kendall-Tau test; $\alpha = 0.05$; p-value: 0.9531)
- The Philippines **performs worse** than Southeast Asian neighbor countries

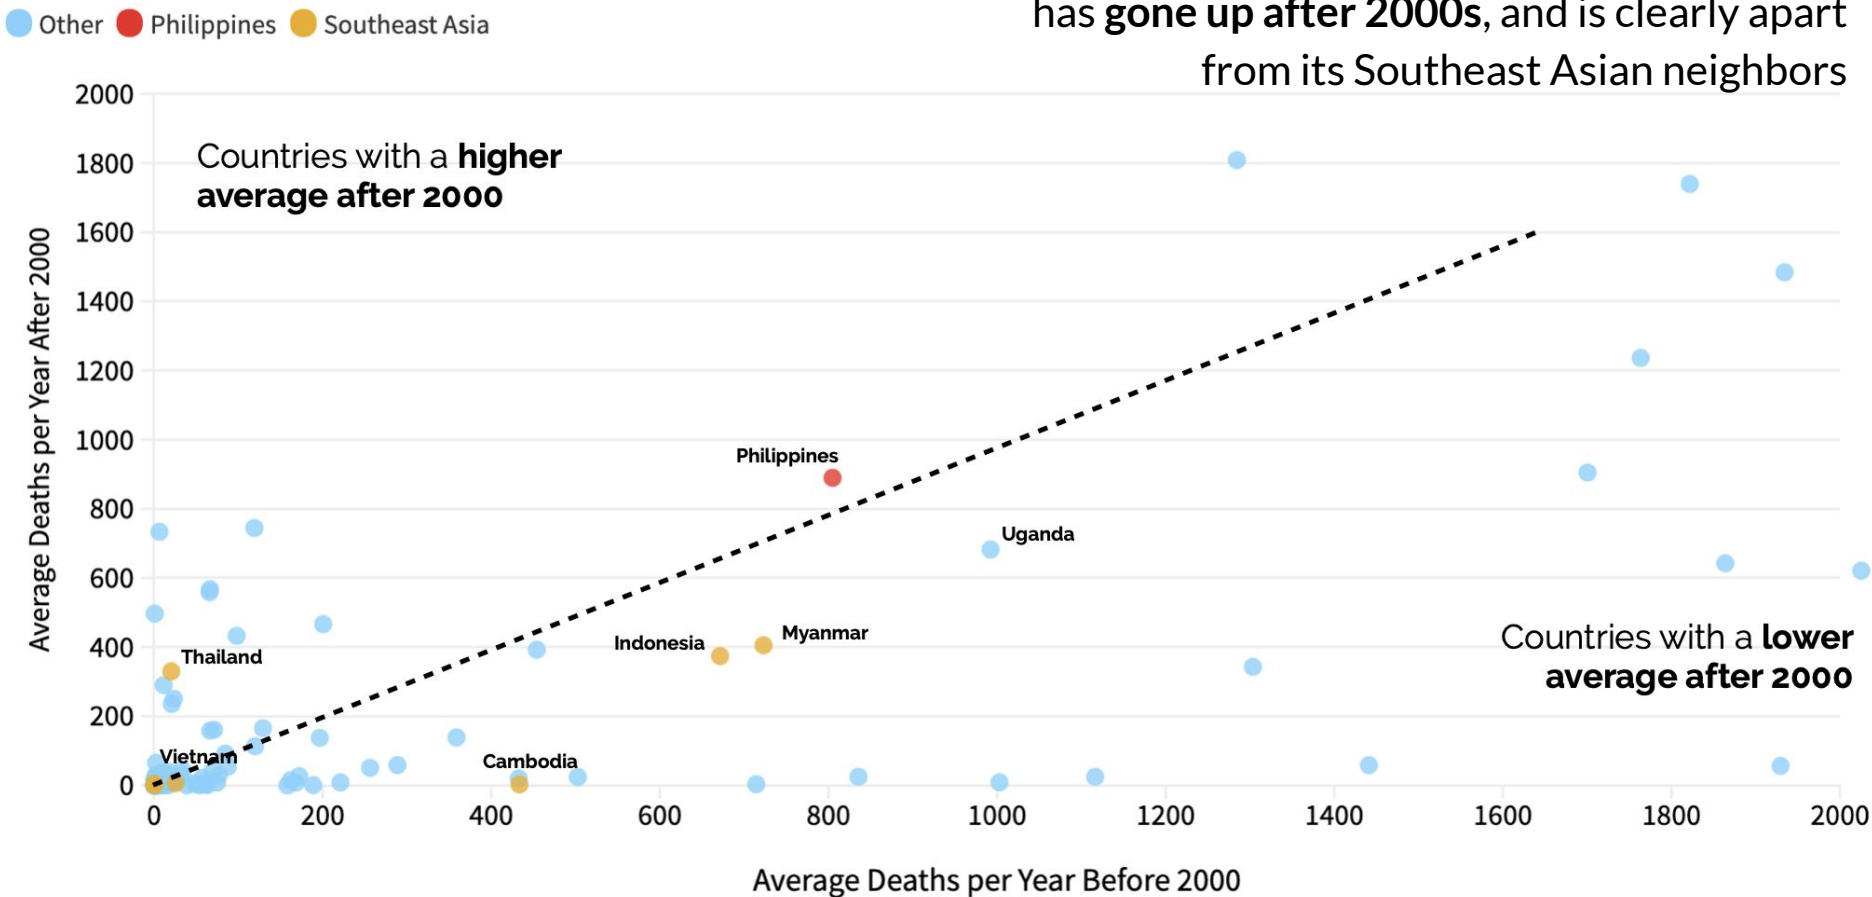

Global Performance

- The Philippines is **among the top 50 countries** with the highest conflict related deaths per 100,000 (Averaged from 2000 to 2017, ranking 182 out of 227)
- The Philippines is **close to other conflict-prone countries**

Country	Conflict Related Death per 100,000
Cameroon	0.923
American Samoa	0.964
Turkey	0.972
Philippines	0.975
Ukraine	1.094
Nigeria	1.177
Kenya	1.197

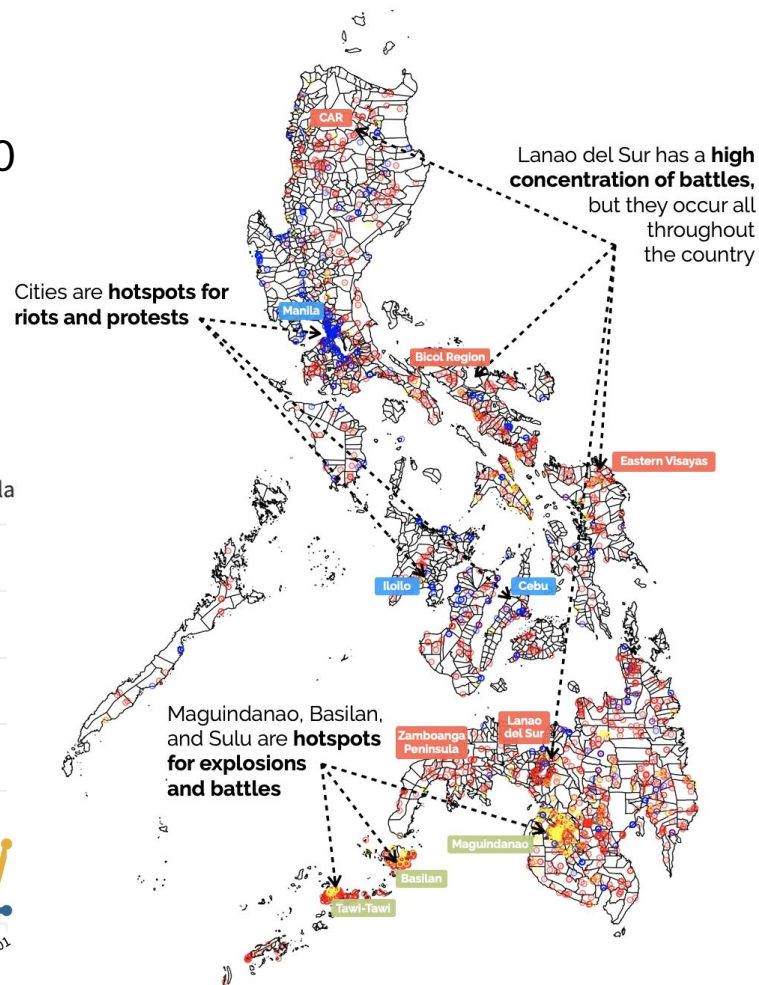

The Philippines' conflict related death rate has **gone up after 2000s**, and is clearly apart from its Southeast Asian neighbors

Conflict at the Local Level

- List of ~10K conflict-related events from 2016-2020
 - Data from Humanitarian Data Exchange
- **Maguindanao and Lanao del Sur** are hotspots for explosions and battles respectively, although conflict is spread throughout the country

Conflict at the Local Level

- Out of 73 provinces, **29** have an **upward trend** in violence, 44 have an downward trend
- However, **only 5** of these negative trends are **statistically significant** ($\alpha = 0.05$)

Province	Change in Number of Battles per Month	p-Value
Bohol	-0.528	0.0440
Lanao del Sur	-0.245	0.0399
Davao de Oro	-0.385	0.0098
Camarines Sur	-0.371	0.0213
Basilan	-0.415	0.0003
Agusan del Sur	0.450	0.0112

Impact of Conflict

Who are fighting, and who are affected?

- Over 80 groups in battle-related conflict
- Strong government participation
 - Military engaged in the most battles from 2016-2020
 - Most often in conflict with NPA (green; see trendlines), and Islamic separatist groups (red)

■ Military ■ PFP ■ NPA ■ Abu Sayyaf ■ MILF ■ Maute

Source: Humanitarian Data Exchange

Impact of Conflict

Who are fighting, and who are affected?

- Significant proportion of **civilian deaths** (8,201 cases; 2016 – 2020)

Caveat: Casualties were split evenly between parties, actual results will likely reveal more civilian deaths

Source: Humanitarian Data Exchange

Impact of Government Intervention

How did the Bangsamoro Law and Anti-Terror bills impact battles in Maguindanao?

- Estimated the effect **directly attributed** to the bills using **difference in differences** method
 - Used Sulu as a counterfactual based on k-Nearest Neighbor algorithm on monthly events before June '18
- Results show **relatively small effects** on conflict reduction
 - Bangsamoro Organic Law: **-0.80 Battles per month**
 - Anti-Terror Bill: **-0.83 Battles per month**

Source: Humanitarian Data Exchange

■ Battles ■ Explosions/Remote violence

Caveat: Data for anti-terror bill calculated with only 2 months of data, may not reflect long-term effect

Sources of Conflict & Policy Recommendations

- Literature states that conflict is linked to **political instability, economic inequality, and weak government institutions**
- Philippine data **support these claims**
 - Municipalities that have experienced battle conflict
 - Have significantly higher poverty rate (p-value: 2.26e-12)
 - Have significantly higher number of protests and riots (p-value: 0.0031)
 - Using rank-sum test; $\alpha = 0.05$; Based off conflict from 2016 to 2020
- Suggests that in order to solve conflict, the government must **address longer-term issues** of political instability and poverty
 - **Difficulty to establish causal effects of such factors** due to a lack of longitudinal, granular data, and the overall complexity of conflict as a phenomenon

Summary

Trends in Conflict

How has the Philippines done? Where will we be in 5 years?

- No significant reduction in conflict related deaths since SDGs started
- Estimated 0.024 less death per 100,000 people every year

Conflict at the Local Level

How are provinces doing in terms of conflict reduction?

- Identified Maguindanao and Lanao del Sur are conflict hotspots
- Only 5 out of 73 provinces showed strong signs of conflict reduction
- Civilians most impacted by conflict

Sources of Conflict & Policy Recommendations

What factors are related to conflict reduction? What can government do to achieve this goal?

- Data supports claims that conflict is tied to political instability and poverty
 - **Recommendation:** Government should pursue long term solutions that address political instability and poverty, in order to reduce conflict
- Lack of data on conflict resolution needed to better understand the situation
 - SDG matrix categorizes the indicator as Tier 3 (no methodology and regular data collection)
 - **Recommendation:** Regularly collect granular data on conflict and related indicators

Global Performance

How does the Philippines compare in the global context?

- Performing significantly worse than Southeast Asian peers
- Similar in conflict-related death rate to Turkey, Ukraine, Nigeria

Impact of Government Intervention

Have the government's efforts reduced conflict?

- Bangsamoro law and anti-terror bill have a small effect on reducing battle and explosion related conflict
